River Bend Hospital is licensed by the Indiana FSSA Division of Mental Health and Addiction and accredited by the Joint Commission as a nonprofit psychiatric hospital.

Acute inpatient mental health treatment is the highest level of psychiatric care. Treatment is delivered in a 24-hour, secure, medically staffed, and protected environment with an interdisciplinary team approach. Daily evaluations by a psychiatrist, twenty-four-hour skilled psychiatric nursing care, medical evaluation, and a structured atmosphere are required. The goal of the inpatient stay is to stabilize the individual experiencing an acute psychiatric condition.

The following criteria are intended to guide the determination of medical necessity for the requested level of care. They are not a substitute for clinical judgment and should be applied by appropriately trained clinicians, considering each patient's unique circumstances, including comorbidities, safety, and the supportiveness of the patient's environment.

PLEASE CALL 765-464-0400 TO INITIATE THE REFERRAL PROCESS

General Admission Criteria for Self- and Non-Medical Referrals (Law enforcement, voluntary self-referral, Non-profit navigators, crisis response center)

When referring a patient from a non-medical facility, our admissions staff will attempt to obtain as much clinically necessary information as possible to determine whether the patient meets the eligibility criteria for admission to our level of care. Additional information may be requested, depending on the individual's care needs.

- Does the patient demonstrate actual or imminent danger to self or others, or is grossly impaired as evidenced by at least ONE of the following (suicidal, homicidal, gravely disabled, etc.)?
- Upon arrival, patient evaluation will include, but not be limited to, assessing the patient's medical history, mental status, symptoms, risk factors, and treatment needs.
- If there is a concern regarding the medical stability of the patient, a referral to a local emergency room will occur.

Medical Referral from Acute Medical Facility

- Labs: CBC with diff, CMP, TSH, UA, and UDS (pending, not necessary to be resultd)
- Current medical status and relevant medical history to include:
 - Vital signs
 - Preexisting medical conditions
 - Can the patient ambulate? Use a walking device? Perform own ADLs?
 - Use of catheters?
- Has the patient been agitated, required PRN medications, assaulted others, or been restrained?
- Is this admission voluntary or involuntary?

Exclusions: Use of oxygen (intermittent or continuous), IV fluids/medications, detox-only, dementia, intellectual developmental disability (diagnosis only), under 18 years of age, and trach. Wound care will be assessed on a case-by-case basis.
